Stakeholder Analysis & Engagement Matrix — WariMitra

Document ID: WM-STK-003

Classification: Stakeholder Identification, Mapping & RACI Matrix

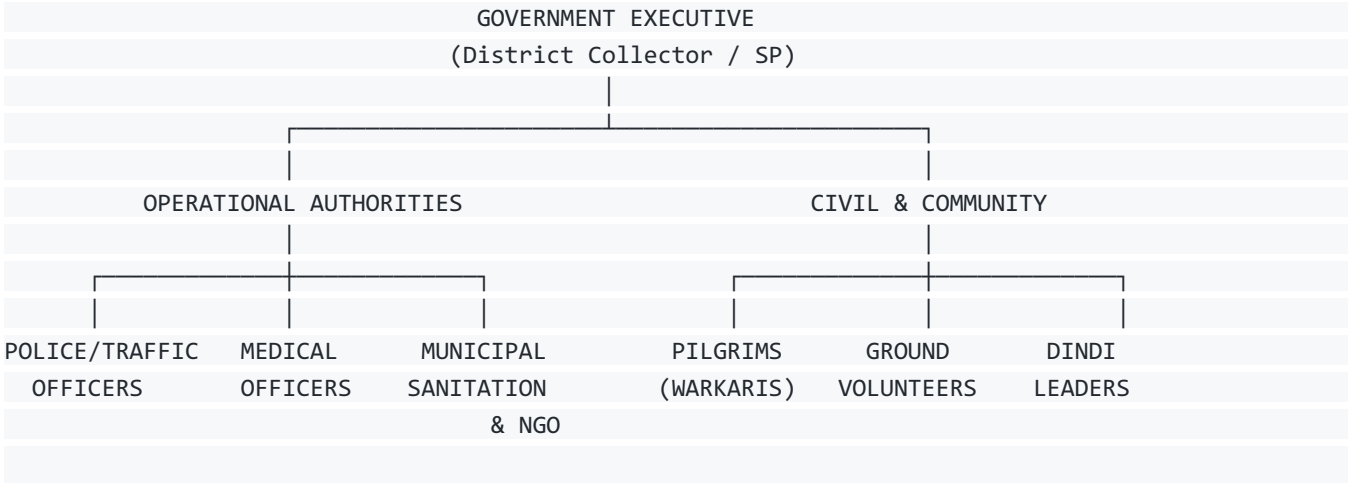

Standard: BABOK v3 Chapter 3 (Business Analysis Planning & Monitoring)

Target Audience: Lead Business Analysts, Program Managers, Agile Product Owners, Interview Evaluators

Source Evidence: `docs/BRD.md:22-30`, `docs/FRD.md:6-15`, `firestore.rules:10-29`, `VARIMITRA_SPEAKER_CONTEXT.md:176-200`

1. Stakeholder Identification & Categorization

In mass-gathering GovTech initiatives, stakeholder groups diverge sharply across operational priorities, digital capabilities, and authority levels. WariMitra encompasses seven primary ground and administrative stakeholders:

2. Power vs. Interest Grid (Mendelow's Matrix)

High Power	[Keep Satisfied] • District Collectors / Magistrates • Pandharpur Temple Trustees • Telecom Infrastructure Providers	[Manage Closely] • Police & Law Enforcement • Chief Medical Officers • State Disaster Management (SDMA)
	[Monitor (Minimum Effort)] • General Public Non-Participants • Transit Merchants & Local Shops • Regional Media & Press	[Keep Informed] • Pilgrims (Varkaris) • Dindi Procession Leaders • NGOs & Charitable Food Camps

```
Low Power  |                                    | • Youth Ground Volunteers
           └____________________________________|_____________________________
                          Low Interest                    High Interest
```

3. Comprehensive Stakeholder Profiles

3.1 Pilgrim / Devotee (*Warkari*)

- **Role & Demographics:** Direct beneficiary and mobile app end-user. Spans all ages (8–85), predominantly rural agrarian background with varying literacy levels.
- **Responsibilities:** Adhere to route guidelines, report personal emergencies or missing relatives, utilize amenities conscientiously.
- **Goals:** Complete the pilgrimage safely, maintain physical well-being, stay in contact with traveling family, have a smooth temple darshan.
- **Pain Points:** Lack of real-time route guidance; getting separated in dense crowds; inability to communicate emergencies quickly; exhaustion from 20+ hour queue lines.
- **Key Requirements:**
- High-contrast, single-tap/hold emergency SOS with zero typing.
- Native Marathi interface with large fonts and simple icons.
- Offline-first map of drinking water, medical tents, and toilets.
- Real-time Darshan queue wait-time visibility.
- **Influence:** High (Collective public voice) | **Interest:** High (Personal safety & devotion)
- **System Interaction:** Flutter Mobile App (`mobile/lib/screens/home_screen.dart`, `sos_screen.dart`).
- **Expected Business Outcome:** Zero unassisted distress situations; rapid family reunification; reduced physical fatigue.

3.2 Ground Volunteer

- **Role & Demographics:** Tech-literate local youth, scouts, or NGO volunteers positioned along the pilgrimage route.
- **Responsibilities:** Assist elderly pilgrims, verify crowdsourced incident reports, provide first-responder

- **Responsibilities:** Assist elderly pilgrims, verify crowdsourced incident reports, provide first-responder guidance during localized congestion.
- **Goals:** Efficiently triage field requests, minimize false alarms, direct medical/police units to exact spots.
- **Pain Points:** Overwhelmed by frantic bystanders; no direct communication line to command center; duplicate work across volunteer squads.
- **Key Requirements:**
- Incident verification dashboard to validate or dismiss citizen reports.
- Task assignment queue showing nearby distress alerts.
- Secure check-in to confirm active on-duty status.
- **Influence:** Medium | **Interest:** High
- **System Interaction:** Flutter Mobile App with Volunteer privilege toggle (`docs/FRD.md:26-30`).
- **Expected Business Outcome:** 80% reduction in unverified/spurious crowd panic calls reaching police dispatch.

3.3 Dindi Leader (*Dindi Pramukh*)

- **Role & Demographics:** Hereditary or elected head of a traditional marching contingent (50 to 500 members). Respected community figure with moderate tech literacy.
- **Responsibilities:** Keep the contingent grouped, ensure morning/evening headcounts, coordinate baggage and tent trucks, oversee member welfare.
- **Goals:** Zero lost members; timely arrival at scheduled camps; rapid notification of emergency within the dindi.
- **Pain Points:** Inability to locate members who drop out of the marching column due to illness or fatigue; chaos during meal times.
- **Key Requirements:**
- Contingent roster management with unique 6-character group invite code.
- Live map overlay displaying current GPS locations and battery levels of group members.
- Broadcast notification tool to blast Marathi announcements to their group.
- **Influence:** Medium-High (Key community influencer) | **Interest:** High
- **System Interaction:** Flutter Mobile App (`mobile/lib/screens/family_locator_screen.dart`, `docs/FRD.md:31-35`).

- **Expected Business Outcome:** Elimination of internal dindi separation; rapid localized search for lost contingent members.

3.4 Medical Officer & Emergency First Responder

- **Role & Demographics:** Government doctors, rural hospital paramedics, 108 emergency ambulance pilots stationed at medical relief camps.
- **Responsibilities:** Acute clinical triage, treating heatstroke/exhaustion/injuries, managing ambulance transport, recording patient intake.
- **Goals:** Immediate notification of medical emergencies; accurate patient count tracking; balanced patient loads across neighboring camps.
- **Pain Points:** Paper registers prevent visibility into surrounding camp occupancy; ambulances stuck in pedestrian congestion; lack of pre-arrival patient data.
- **Key Requirements:**
- Real-time medical SOS feed with patient GPS and direct phone dialer.
- Bed capacity and patient count management tool (`medicalCamps/{campId}`).
- Proximity search capability for ambulance routing.
- **Influence:** High | **Interest:** High
- **System Interaction:** Web Command Center (`frontend/src/app/medical/`) and Mobile App.
- **Expected Business Outcome:** 50% faster ambulance dispatch-to-scene arrival; zero camp over-capacity surprises.

3.5 Police & Traffic Control Officer

- **Role & Demographics:** Sub-Inspectors, Deputy Superintendents, and Traffic Marshals overseeing law and order, security, and highway diversions.
- **Responsibilities:** Crowd density control, stampede prevention, vehicular diversion, VIP movement security, investigating lost/found and missing persons.
- **Goals:** Absolute prevention of stampedes; free-flowing pilgrimage routes; rapid de-escalation of public safety incidents.

- **Pain Points:** Blind spots along rural ghat roads; delayed notification of sudden crowd bottlenecks; public panic due to rumors.
- **Key Requirements:**
- Live GIS heatmap integrating pilgrim GPS pings.
- Incident queue with status lifecycle management (`pending` $\rightarrow$ `acknowledged` $\rightarrow$ `dispatched` $\rightarrow$ `resolved`).
- Missing persons repository with searchable photo records.
- **Influence:** High | **Interest:** High
- **System Interaction:** Web Command Center (`frontend/src/app/police/`, `frontend/src/app/crowd/`).
- **Expected Business Outcome:** Proactive crowd diversion 30 minutes before critical density thresholds; verified incident closure.

3.6 NGO & Relief Coordinator

- **Role & Demographics:** Representatives of non-profit trusts, religious charities, and philanthropic kitchens (*Annachhatras*).
- **Responsibilities:** Preparing and serving free meals (*Mahaprasad*), distributing bottled water, dry rations, and blankets.
- **Goals:** Efficient food distribution; zero food wastage; reaching underserved trailing pilgrim columns.
- **Pain Points:** Food spoiling due to unexpected route delays; multiple NGOs setting up kitchens in the same 500m zone while other sectors starve.
- **Key Requirements:**
- Facility registration interface to declare location, item type, and daily feeding capacity.
- Demand heatmaps indicating where pilgrim concentrations are underserved.
- **Influence:** Medium | **Interest:** High
- **System Interaction:** Web Command Center (`frontend/src/app/ngo/`) & Mobile Directory.
- **Expected Business Outcome:** Optimal spatial distribution of relief camps along the 250 km highway corridor.

3.7 Government Administrator / District Magistrate

- **Role & Demographics:** District Collector, Superintendent of Police (SP), Municipal Commissioner, Temple Trust Chief Executive.
- **Responsibilities:** Overall administrative governance, inter-agency resource authorization, disaster response protocol sign-off, public accountability.
- **Goals:** Zero fatalities; positive public perception; transparent governance; budget compliance.
- **Pain Points:** Contradictory reports from disparate department heads; post-incident blame games during inquiry commissions.
- **Key Requirements:**
- Executive KPI dashboard showing active SOS alerts, open camps, total active pilgrims, and temple queue velocity.
- Non-repudiable audit logs backed by cryptographic blockchain proofs for incident investigation.
- **Influence:** Critical / Highest | **Interest:** High
- **System Interaction:** Web Command Center (`frontend/src/app/page.tsx`).
- **Expected Business Outcome:** Unified command-and-control; defensible, data-backed administrative audits.

4. Stakeholder RACI Matrix

Project Activity / Capability	Pilgrim	Volunteer	Dindi Leader	Medical Officer	Police Officer	NGO Coord	Govt Admin
Emergency SOS Trigger	**R**	C	**R**	I	I	I	I
SOS Triage & Dispatch	I	C	I	**A / R**	**A / R**	I	I
Missing	**R**	C	**R**	I	**A / R**	I	I

Missing

Project Activity / Capability	Pilgrim	Volunteer	Dindi Leader	Medical Officer	Police Officer	NGO Coord	Govt Admin
Person Intake							
Medical Camp Bed Updates	I	I	I	**A / R**	I	I	I
